Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claims 7-11, 20-24 and 33-37 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the paper filed 2-12-3.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 12-14, 25-27, 38 and 39 are rejected under 35 U.S.C. 102(b) as being anticipated by Yoshigai (5606199).

The rejection is maintained as in the previous office action and is further clarified infra.

Yoshigai teaches the projection [not labeled] directly connected to a substrate 1.

Also, although Yoshigai teaches the die 4 being secured to the paddle 7 with an adhesive [not labeled], Yoshigai is no longer relied on for the teaching of an electrically conductive adhesive paste.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 2-6, 15-19 and 28-32 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yoshigai as applied to claims 1, 12-14, 25-27, 38 and 39, and further in combination with applicant's admitted prior art.

Applicant's admitted prior art is applied to the rejection for the same reasons it was applied in the previous office action.

Applicant's amendment and remarks filed 2-12-3 are addressed in the rejection supra and are further addressed infra.

Applicant simply states without elaboration that Yoshigai does not teach particular ones of the claim limitation. These statements are respectfully traversed because, as explicitly and clearly set forth in the rejections, Yoshigai teaches these limitations.

Also, applicant alleges that Yoshigai does not teach "structural members," and, "'gang' bonding, i.e. flip-chip bonding." This allegation is respectfully deemed unpersuasive because the scope of the claims is not so limited, and Yoshigai is not necessarily applied to the rejections for these teachings.

In addition, applicant asserts that Yoshigai teaches away from the claimed invention because Yoshigai teaches conductive paste and does not teach non-conductive adhesive. This assertion is respectfully traversed because the mere teaching of Yoshigai of an alternative embodiment does not constitute a teaching away from the claimed embodiment. Furthermore, Yoshigai is applied to the rejection only for the teaching of an adhesive, and not for the teaching of an electrically conductive adhesive paste. In any case, as applied to the rejection, applicant admits that both conductive and nonconductive paste are well known alternative die attach methods.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action

Application/Control Number: 09/342,789

is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
